About Me

As an ambitious and hardworking undergraduate student in Information Technology Engineering, I have a strong passion for using technology to solve problems and create innovative solutions. I have developed a diverse skill set through my coursework, extracurricular activities, and technical projects, and I am eager to apply these skills in a real-world setting through an internship or entry-level position. My technical expertise in programming languages such as C, C++, HTML, CSS, JS, and Java, as well as my experience in event management and project leadership, make me a well-rounded and adaptable candidate for any technology-focused role.
