**Programming :** C, C++, DSA

**Web Stack :** HTML, CSS, Bootstrap, JavaScript, React, Mongoose, NodeJS, Express, REST API, Authentication with JWT

**Databases:** MongoDB, MySQL, Firebase

**Tools :** Git, Github, Render, Vercel, Canva, Linux, Postman

## WORK EXPERIENCE

Workabl (Pune) | [Certificate](#)

Apr 2023 - May 2023

### Web Development Intern

- Completed a one-month full-stack web development internship at Workabl, creating a production-grade feature for managing webinars.
- Actively participated in the development of **REST APIs** using **Node.js**, **MySQL**, and the **Serverless** Framework, which were hosted on **AWS**. Integrated these APIs seamlessly into the comprehensive **ReactJS** frontend
- Gained valuable insights into industry practices and familiarized myself with key components/practices such as **AWS Lambda**, **API Gateway**, **S3**, **Redis**, **Agile**, and **Scrum** methodologies

## PROJECTS

E-Ticket Connect [GitHub](#) | [Website](#)

Feb 2024

- Created an online ticketing platform with three types of login roles: Admin, User, and Conductor, ensuring tailored access and functionalities for each role.
- Implemented secure and efficient payment processing along with e-tickets, revolutionizing traditional ticketing systems.
- Created a comprehensive dashboard visualization of ticket data using **ChartJS** and **React-Dashboard**, providing users with insightful analytics, real-time updates and enhancing reporting efficiency by 50%.
- Utilized **React** for the front-end, and **NodeJS** with **Express** for the back-end. Integrated **MongoDB Atlas** for secure data management, supporting over 20+ bus routes The platform is running using reliable cloud services.

TrekTravel [GitHub](#) | [Website](#)

Oct 2023

- Developed TrekTravel, a comprehensive travel guide website, allowing users to plan their journeys with ease
- Implemented the project's front-end using **ReactJS** and leveraged React Hooks (**useState**, **useEffect**, **useContext**) for enhanced functionality and Backend using **NodeJS**, **ExpressJS** & **CORS**
- Incorporated **MongoDB Atlas** as the database technology, enhancing user security by implementing **JWT** authentication and **Cookie** handling within the system
- Deployed the website's backend on **Render** and frontend on **Firebase**

Personal Portfolio Website [GitHub](#) | [Website](#)

Mar 2023

- Built a personal portfolio website using **ReactJS 18** to showcase projects, skills, and achievements.
- Set up and deployed a responsive portfolio website and hosted on **Firebase** for seamless accessibility
